

MANASLU ROUND 15 DAYS / N208212

Highlight information

- ✓ At 8,163 metres, Manaslu is the world's eighth-highest mountain, offering a dramatic and less-crowded alternative to the busier Annapurna region.
- ✓ The trek winds through a secluded valley with fewer trekkers, providing a more peaceful and authentic Himalayan adventure.
- ✓ Traditional villages along the route are home to diverse ethnic groups, offering rich cultural interactions and insight into local mountain life.
- ✓ Set in a beautiful natural amphitheatre, this monastery marks the spiritual gateway to the Buddhist region and adds cultural depth to the journey.
- ✓ At 5,135 metres, this high mountain pass is the trek's most demanding point, rewarding hikers with landscape views and a dramatic transition into lush lower valleys.

Overview

Rising to 8,163 metres, Manaslu—the eighth-highest peak in the world—offers a compelling alternative to Nepal's busier trekking routes. The Manaslu Circuit Trek winds through a secluded and less-travelled valley, providing an immersive experience in both natural beauty and cultural richness. As modest infrastructure gradually develops, the region retains its raw, untamed charm, far from the crowded trails of the Annapurna Circuit.

A highlight of the journey is the serene Sama Gompa monastery, set in a natural amphitheatre beneath Manaslu's imposing massif. This marks the gateway to the Buddhist highlands, where prayer flags flutter and centuries-old traditions endure. The trek culminates at the dramatic Larkya La Pass (5,135 metres), offering sweeping Himalayan panoramas before descending into the lush lower valleys.

Throughout the route, trekkers are treated to awe-inspiring mountain views, ancient forests, and a mosaic of traditional villages inhabited by diverse ethnic communities—making the Manaslu Circuit a truly enriching and less commercialised Himalayan adventure.

Trip Grading

Although there are no any distinct and universal grading systems for treks, a general rule of grading is followed to understand the difficulty of a trekking. In Nepal, trekking routes are categorized based on difficulty to help trekkers select suitable adventures. These categories consider factors such as altitude, terrain, duration, and required experience.

Grade 4: Strenuous Treks

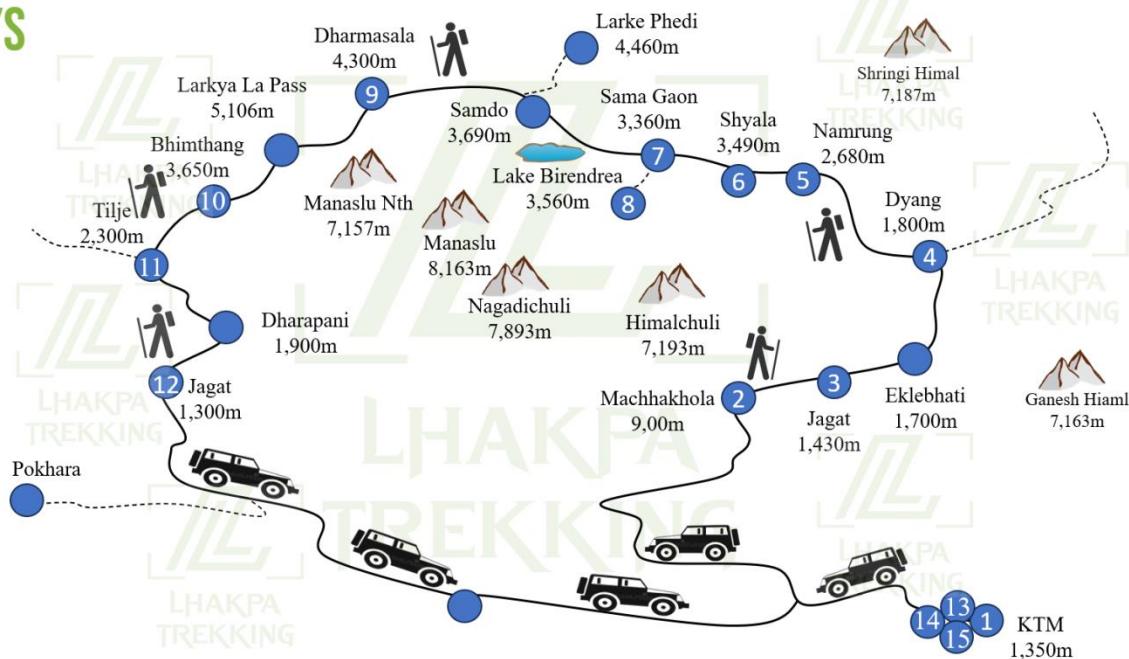

- Altitude: 4,500–6,000 meters
- Duration: 6–8 hours of walking per day
- Terrain: Steep ascents, rocky paths, and potential snow
- Experience Required: Suitable for experienced trekkers with good physical fitness

- Examples: Everest Base Camp Trek, Manaslu Circuit Trek and all the high passes (Tilicho Thorong la, Ganja la, Mesokanta la, Kang la, Larkya la, Chola la, Kongma la, Renjola).

Itinerary & map

MANASLU ROUND 15 DAYS

Day 1

Arrive Kathmandu 1350m. Transfer to the hotel

Your happy holiday starts in Kathmandu. From airport to hotel transferred included depending on arrival times, you will be able to have a freshen up before briefing with guide in the late afternoon. According to the time, you can walk/drive to Swayambhunath Stupa (Monkey Temple) and from here watch your first Nepali sunset over the Kathmandu Valley, from the oldest stupas in Nepal and is now an important centre for Buddhism. This is one of the most important world heritage sites of Nepal.

Accommodation: Hotel. **Meals excluded:** Breakfast included, **Transfer:** 20 M drive

Day 2

Kathmandu - Machhakhola (900 m)

Today, we drive from Kathmandu to Machhakhola (900 m) by jeep. We first follow the highway to Muglin, then head toward Arughat. After that, the road becomes rough and passes through villages like Soti Khola, following the Budi Gandaki River. The drive is scenic with hills, rivers and fields, ending at Machhakhola, the starting point of the Manaslu trek.

Accommodation: Lodge. Meals included: morning noon evening.

Transfer: 7/8 hours drive.

Day 3

Machha Khola - Jagat (1,430 m)

After breakfast, we hike to Jagat following the Budi Gandaki River, crossing suspension bridges and passing small villages. The trail gently climbs through forests and farmland. After about 5–6 hours, you reach Jagat, a stone-paved village and the entry point to the Manaslu Conservation Area. The route offers nice river views and local village life. .

Accommodation: Lodge. Meals included: morning noon evening.

Elevation gain: 1100 m. **Elevation loss:** 700 m. 7 hours walking.

Day 4

Jagat- Eklebhati (1700 m) - Dyang (1800)

Today, we start with a gentle uphill walk through forests and small villages along the Budi Gandaki River. After crossing a suspension bridge, the trail continues to climb gradually. From Eklebhati, the path leads to Dyang, passing through terraced fields and local farms. The walk is peaceful and scenic, with views of surrounding hills and traditional villages.

Accommodation: Lodge. Meals included: morning noon evening.

Elevation gain: 1110 m. **Elevation loss:** 760 m. 7.5 hours walking.

Day 5

Dyang - Bhi Phedi (2050) - Namrung (2680)

Early morning, we hike with a gradual climb through forests and farmland, crossing a suspension bridge along the way. From Bhi Phedi, the trail becomes steeper as you continue ascending toward Namrung. Along the way, you pass traditional villages, terraced fields and enjoy beautiful mountain views. The hike is steady but rewarding, leading to Namrung, a charming village known for its rich culture and stunning scenery.

Accommodation: Lodge. Meals included: morning noon evening.

Elevation gain: 1340 m. **Elevation loss:** 480 m. 6/5 hours walking.

Day 6

Namrung - Syaula (3490 m)

On the sixth day, we climb steadily through forests and fields. As you go higher, the trees become fewer and you see beautiful mountains. After a few hours, you reach **Syaula**, a peaceful village perfect for resting and getting used to the altitude.

Accommodation: Lodge. Meals included: morning noon evening.

Elevation gain: 1120 m. **Elevation loss:** 240 m. 6 / 7 hours walking.

Day 7

Syaula - Pugyen Gumba - Sama Gaon (3360)

From Syaula, We trek through forests and yak pastures to the peaceful Pungyen Gumba, a serene monastery with close views of Mt. Manaslu. After visiting the Gumba, the path gradually descends and rejoins the main trail. Passing through alpine meadows, mani walls and small villages, the trail gently climbs to the beautiful village of Sama Gaon (3360m), rich in Tibetan culture and surrounded by majestic mountain scenery.

Accommodation: Lodge. **Meals included:** morning noon evening.

Elevation gain: 880 m. **Elevation loss:** 610 m. 5 / 6 hours walking.

Day 8

Samagaon - Lake Birendrea (3560 m) - Samdo (3690)

After finishing breakfast, we walk a short, easy trail to Lake Birendra, a beautiful lake with great views of Manaslu. Then you return to the main path and continue to Samdo, a small mountain village good for rest and acclimatization.

Accommodation: Lodge. **Meals included:** morning noon evening.

Elevation gain: 460 m. **Elevation loss:** 160 m. 3 to 4 hours walking.

Day 9

Samdo - Dharmasala (Larkya High Camp) (4300 m)

Today, we ascend through a barren, rocky valley with impressive views of surrounding snow-covered peaks. After crossing a wooden bridge over the Budhi Gandaki River, the path continues through alpine terrain, becoming increasingly rugged and remote. The walk is steady but not overly steep, passing through scattered yak pastures. After a few hours of trekking, you arrive at Dharmasala, also known as Larkya High Camp (4300 m), a basic resting point used by trekkers before crossing the challenging Larkya La Pass.

Accommodation: Lodge. **Meals included:** morning noon evening.

Elevation gain: 520 m. 4 hours walking.

Day 10

Dharmasala - Larkya la / pass (5106 m) Bhimthang (3650 m)

Today, we ascent along the eastern side of the pass, start gradually—almost too gradually—creating the illusion of little progress. Ahead, the striking Larkya Peak dominates the view. From this point and throughout the long descent across a vast moraine, we're treated to beautiful landscape views of the Peri Himal mountain cirque.

Accommodation: Lodge. **Meals included:** morning noon evening.

Elevation gain: 750 m. **Elevation loss:** 1550 m. 7/9 hours walking.

Day 11

Bhimthang - Tilje (2300 m)

Today marks the final day of our Manaslu trek, featuring a long descent through the lower hills. We eventually cross a suspension bridge over the Marsyangdi River to arrive at the village of Dharapani. From there, we continue on foot along the road—the only available route—to reach the picturesque village of Tal, known for its scenic beauty. After passing through Tal, we descend further, briefly leaving the road to cross a final suspension bridge and switch to the opposite side of the valley. A short walk along the road then brings us to the village of Jagat. This evening, we share our final moments with the porters—a meaningful time to reflect on the journey and celebrate the experiences we've shared together.

Accommodation: Lodge. **Meals included:** morning noon evening.

Elevation gain: 100 m. **Elevation loss:** 1300 m. 5 / 6 hours walking.

Day 12

Tilje - Dharapani (1900 m) - Jagat (1300 m)

On this day, we descend through lush forests and small settlements, crossing several suspension bridges along the way. After a short trek, you reach Dharapani (1900 m), a busy junction where the Annapurna and Manaslu trekking routes meet. Continuing downhill, the path follows the Marsyangdi River, passing through beautiful landscapes, waterfalls and terraced fields. The trail then leads to the village of Jagat (1300 m), a charming settlement with traditional stone houses and a relaxed atmosphere.

Accommodation: Lodge. **Meals included:** morning noon evening.

Elevation gain: 100 m. **Elevation loss:** 1200 m. 6 hours walking.

Day 13

Jagat – Kathmandu

We set off early in the morning by vehicle, heading toward Besisahar. After a drive of about two to three hours, we arrive at the main road in Dumre, where we transfer to a bus for the journey back to Kathmandu.

Accommodation: Lodge. **Meals included:** morning noon.

Transfer: 7 / 8 hours drive.

Day 14

Kathmandu – Souvenirs day, sightseeing day or free day.

Among the options, if you are heading for sightseeing, this day-day cultural tour will offer you a well-rounded experience of Kathmandu's history, spirituality and art while being guided by an expert, certified who can enrich your understanding of the city's unique heritage.

Here's a suggested itinerary and price that balances history, culture and local experiences. Maximum visited only three sites in day.

- Swayambunath
- Bhaktapur
- Boudhanath
- Patan Darbar square
- Kathmandu Darbar square

In this price, an expert and certified cultural and tour guide a vehicle reserved and a professional driver for whole during the sightseeing.

2-3 pp 70€, 4-6 pp 50€, 7-10 pp 35€, 11-15+ 30€

Day 15

Back to the native land

According to your flight schedule the grand departure. We will come to drive you to the airport.

What's included

- Ground travel as specified in the programme.
- Domestic flights as described.
- Accommodation as described in the programme.
- Hotel as described in the programme.
- Meals as described in the programme.
- Entrance fee to Annapurna Park.
- Professional guide
- Assistance from a local team during the trek.
- A first aid kit.
- 1 porter for 2 clients

What's not included

- Travel Insurance
- International flight
- Tips for porters and other trek staff
- Drinks, souvenirs, Wifi internet, etc.
- Anything not listed under " price includes

Personal Expenses

Trekking in Nepal includes most major costs, but PERSONAL EXPENSES vary depending on individual spending habits. On average, €200 (\$200-250 USD) should cover:

- Beverages – Soft drinks, tea, coffee, and alcoholic drinks (prices increase with altitude).
- Snacks & Extras – Chocolates, energy bars, and personal food purchases along the trek.
- Souvenirs – Handicrafts, prayer flags, and traditional items from trekking villages.
- Tips for Guides & Porters – Tipping is customary in Nepal; recommended \$5-\$10 per day for guides and \$3-\$5 for porters.

Tips and gratitude

Tipping is a long-standing tradition in the adventure sector in Nepal and a meaningful way to show appreciation for the hard work of guides, porters, and trekking staff. While not mandatory, it is customary to tip at the end of the trek, usually as a group, to ensure a fair and organised distribution. Your trek guide will

advise on an appropriate amount based on the trek duration and team size. Many groups present tips with a small farewell gathering or celebration on the last evening, marking the end of their trek. Additionally, trekkers often choose to donate equipment such as boots, gloves, hats, scarves, and trekking poles to the porters and crew. These items are highly valued and appreciated, especially by those working in the mountains. Tour leaders can be tipped separately during the final group dinner in Kathmandu or Pokhara. Though not obligatory, a small personal token of gratitude for their efforts enhances the spirit of mutual respect and appreciation.

Best time to visit Nepal

Frankly, Nepal is an all-season tourism destination. However, for adventure enthusiasts, there are 2 major seasons to visit Nepal. Here is a detailed look at the seasons and their weather patterns in Nepal for you to decide when best to visit:

Season	Months	Weather Characteristics	Trekking Conditions
Spring	March – May	Mild temperatures, clear skies, blooming rhododendrons	Excellent for trekking, colorful landscapes
Summer/ Monsoon	June – August	Heavy rainfall, humid, cloudy	Difficult due to slippery trails and poor visibility
Autumn	September – November	Stable weather, clear skies, moderate temperatures	Best season for trekking, peak tourist time
Winter	December – February	Cold temperatures, snowfall at high altitudes	Suitable for lower-altitude treks, high passes may be closed

Weather condition in spring (March -May)

Average Temperature:

- Kathmandu & Pokhara: 10°C – 30°C
- Everest Base Camp & Annapurna Base Camp: 5°C – 15°C
- weather, clear mornings, occasional afternoon clouds.
- Flowers and rhododendrons bloom, making the trails scenic.
- increasing humidity in late May, signalling the approaching monsoon
- Everest 3 Passes Trek – Best visibility of Everest.
- Peaky Peak Trek– Best for rhododendrons, Sherpa culture and mountains.
- Annapurna Regions – Best for rhododendrons, lush landscapes and moderate temperatures.
- Langtang Valley Trek– Ideal for nature lovers with vibrant forests and mountain

Weather condition in Summer (june - august)

Average Temperature:

- Kathmandu & Pokhara: 20°C – 35°C

- Everest Base Camp & Annapurna Base Camp: 0°C – 20°C

Weather & Conditions:

- Heavy rainfall (average 200–500 mm per month), especially in July and August.
- Frequent landslides and flight cancellations, especially in hilly areas.
- Leeches on lower-altitude trails due to humidity.

Best Treks for Summer: (Only in rain-shadow areas with minimal rainfall)

- Upper Mustang Trek – Lies behind the Himalayas, shielded from the monsoon.
- Dolpo Trek – Dry, high-altitude desert with unique Tibetan culture.

Weather condition in Autumn (September - November) Best Trekking Season

Average Temperature

- Kathmandu & Pokhara: 10°C – 28°C
- Everest Base Camp & Annapurna Base Camp: -5°C – 15°C

Weather & Conditions:

- Stable weather, crystal-clear skies, and moderate temperatures.
- Best visibility of Himalayan peaks, making it the most popular season.
- Crowded trekking trails, especially on Everest Base Camp and Annapurna Circuit.

Best Treks for Autumn:

- Everest Base Camp Trek – Peak visibility of Everest.
- Manaslu Circuit Trek – Challenging but scenic and less crowded.
- Gokyo Lakes Trek – Stunning turquoise glacial lakes

Weather condition in Winter (December - February)

Average Temperature:

- Kathmandu & Pokhara: 2°C – 20°C
- Everest Base Camp & Annapurna Base Camp: -15°C – 10°C

Weather & Conditions:

- Cold temperatures, snowfall at higher elevations.
- Shorter daylight hours, some high passes (e.g., Thorong La) may be closed.
- Fewer trekkers, offering solitude.

Best Treks for Winter: (Lower-altitude treks to avoid extreme cold)

- Ghorepani Poon Hill Trek – Short, scenic trek with snow-capped views.
- Everest Panorama Trek – Lower-altitude trek with Everest views.
- Helambu Trek – Close to Kathmandu, no high passes.

Best Treks in summer season

- Upper Mustang Trek – Lies behind the Himalayas, shielded from the monsoon.
- Dolpo Trek – Dry, high-altitude desert with unique Tibetan culture.

Best Trekking Destination in Nepal

This is tough to say because every destination in Nepal is a wonder on itself. Broadly, from adventure perspective, you'll find two major types of destinations. The first ones are the most popular ones which often

are the most accessible and will have huge number of trekkers in seasons. These destinations often have a long history of exploration and something of global sensation what make them popular every year. These destinations include:

- Everest Base Camp Trek
- Annapurna Circuit Trek
- Annapurna Sanctuary Trek
- Upper Mustang Trek
- Upper Dolpo Trek
- Langtang Valley Trek
- Manaslu Circuit Trek, etc.

Then there are these other groups of destinations which are not as popular but offer an unmatched level of serenity, peace and wilderness that is hardly found anywhere. They offer the true sense of adventure, experience and the thrill of exploration. These destinations in Nepal include:

- Ruby Valley Trek
- Tamang Heritage Trail
- Api Himal Base Camp Trek
- The Great Himalayan Trail
- Makalu Base Camp Trek
- Sherpini Col Trek
- Kanchenjunga Base Camp Trek
- Dhaulagiri Circuit Trek
- Sisne Himal Trek, and so on.

The choice of your destination depends on your time, cost, and the experience you wish to have.

Food and Accommodation in Nepal

Food (meal plan) and accommodation are among the most important things when in Nepal and in course of the trek. Please make sure to let the booking agency know of your allergies if you have any and also let them know if you are in any personal medication and need special attention at any time during the trek

Accommodation in Kathmandu & Pokhara

- Hotel Standards – Most trekkers stay in 2-3 star hotels in Thamel (Kathmandu) or Lakeside (Pokhara) before and after trekking.
- Twin-Sharing Basis – Standard bookings are twin-sharing, but single rooms can be arranged at an extra cost.
- Facilities – Hotels offer hot showers, Wi-Fi, laundry services, and 24-hour electricity.

Accommodation in Trekking Regions

- Teahouses / Lodges – These are family-run guesthouses with dorm-style or twin rooms.
- Basic Bedding – Rooms have wooden beds, foam mattresses, blankets, and pillows, but heating is not available in most lodges.
- Shared Bathrooms – Most lodges have shared toilets and limited hot water (solar-heated in some places).
- Dining Areas – Warm communal dining halls serve as social hubs for trekkers.
- Electricity & Wi-Fi – Available in lower-altitude teahouses but may require extra charges at higher altitudes.
- No Single Rooms at Higher Altitudes – In remote areas, multi-bedded rooms may be the only option.

Meals in Kathmandu & Pokhara

- Breakfast & Dinner – Served at hotels or local restaurants.
- Wide Food Selection – Includes Nepali, Indian, Chinese, and Western cuisine.
- Popular Dishes – Dal Bhat (lentils & rice), Momos (dumplings), Thukpa (Tibetan noodle soup), pizza, pasta, curries, and grilled meats.

Meals During Trekking

- Standard Trekking Meal Plan – Breakfast, lunch, and dinner included in most trekking packages.
- Dining at Lodges – Meals are prepared in teahouse kitchens, with all trekkers typically eating the same menu.
- Ordering in Advance – Due to limited supplies in remote areas, meals must be ordered in advance.

Common Meals on Treks

- Breakfast: porridge, pancakes, Tibetan bread, chapati, eggs, tea/coffee.
- Lunch & Dinner: Dal Bhat (lentil soup, rice, vegetables), noodles, pasta, potatoes, soups, and curries.
- Vegetarian Options Available: Meat is available at lower altitudes but not recommended at high altitudes due to storage concerns.
- Soup & Hydration: Garlic soup is often recommended as it helps with acclimatisation.

Water & Hydration

- Drinking Water Safety – Tap water is not safe for drinking in Nepal.
- Filtered/Boiled Water Provided – Teahouses offer boiled or filtered water (often at extra cost).
- Water Purification Recommended – Trekkers should bring purification tablets, LifeStraw, or Water-to-Go bottles.
- Avoid Plastic Bottles – Buying bottled water is expensive and environmentally harmful.

Visa on Arrival

Nepal offers Visa on Arrival for most nationalities at Tribhuvan International Airport (TIA) in Kathmandu and certain land border checkpoints. The process is straightforward:

1. Fill out the visa application form (available online at Nepal Immigration or at the airport).
2. Submit a passport-sized photo (carrying one is advisable).
3. Pay the visa fee (preferably in USD). Visa Fees (as of 2025)
 - 15 Days – \$30 USD
 - 30 Days – \$50 USD
 - 90 Days – \$125 USD

Multiple Entry – Additional \$20 USD (if you need to leave and re-enter Nepal)

Visa from Nepalese Embassies & Online Application (e-Visa)

- Travelers can also obtain visas from Nepalese embassies or consulates before arrival.
- Online application (e-Visa) is available via the official Nepal Immigration website (<https://www.immigration.gov.np/>).

Visa Extensions

- Available at the Department of Immigration in Kathmandu or Pokhara.
- Costs \$3 per day after the original visa expires.
- Minimum extension is 15 days (\$45 USD), and maximum is up to 150 days per calendar year.

Visa Exemptions

- Indian nationals do not require a visa to enter Nepal.
- SAARC country citizens (except Afghanistan) get a free 30-day visa on their first visit in a year.
- Children under 10 years old are exempt from visa fees.

Restricted Areas & Special Permits

Certain trekking regions, such as Upper Mustang, Upper Dolpo, and Manaslu, require special permits in addition to the standard visa. These must be arranged through a registered trekking agency.

Entry Points for Visa on Arrival

Apart from Kathmandu Airport, visas can also be obtained at:

- Kakarbhitta (Eastern Nepal, near India)
- Birgunj (Central Nepal, near India)
- Bhairahawa (Western Nepal, near Lumbini)
- Nepalgunj (Mid-Western Nepal, near India)
- Dhangadhi (Far-Western Nepal, near India)
- Mahendranagar (Far-Western Nepal, near India)
- Rasuwagadhi (Near Tibet-China border)

Notes for passports

- Passport validity: Your passport must be valid for at least six months from your arrival date.
- Proof of onward travel: Immigration may ask for a return flight ticket or itinerary.

- Visa payment: Cash payments in USD, Euro, or major currencies are accepted (credit cards may not be an option at some entry points).

Insurance

Travel insurance is mandatory for many trekking routes in Nepal, including Everest Base Camp, Annapurna Circuit, Manaslu, and Upper Mustang. Given Nepal's rugged terrain, high altitudes, and limited healthcare facilities in remote areas, a comprehensive insurance policy ensures financial protection in case of emergencies.

When purchasing insurance for Nepal, ensure it covers the following:

1. High-Altitude Trekking & Mountaineering

- Standard travel insurance may not cover trekking above 3,000 meters (9,842 ft).
- Policies must include coverage up to 6,000 meters (19,685 ft) if trekking to Everest Base Camp, Annapurna, or other high-altitude destinations.
- Climbers attempting peaks above 6,000m (e.g., Island Peak, Mera Peak) require mountaineering-specific insurance.

2. Emergency Helicopter Evacuation

- Helicopter rescue costs \$5,000 – \$10,000 USD per evacuation in Nepal.
- Ensure your policy explicitly includes air evacuation in remote areas.
- Some insurers may require pre-authorization, so confirm the claim process in advance.

3. Medical Expenses & Hospitalization

- Coverage should include treatment for altitude sickness (AMS, HAPE, HACE), fractures, infections, and general injuries.
- Kathmandu has high-quality private hospitals, but serious cases may require medical evacuation to Thailand or India.

4. Trip Cancellation & Delays

- Due to unpredictable weather, flights to Lukla (Everest region) and Jomsom (Annapurna region) are frequently delayed or canceled.
- A good policy should cover trip cancellations, rescheduling fees, and extra accommodation costs.

5. Lost or Stolen Gear

- Nepal is generally safe, but lost luggage, stolen equipment, or damage to personal belongings can happen.
- Policies should cover trekking gear, cameras, and electronics.

Recommended Insurance Providers

- Reliable insurance providers for Nepal trekking include:
- World Nomads – Covers trekking up to 6,000m, medical, evacuation, and delays.
- Global Rescue – Specializes in helicopter evacuation and high-altitude trekking coverage.
- Allianz Travel Insurance – Comprehensive trip cancellation and medical coverage.
- Trawick International – Covers adventure sports, including peak climbing.
- True Traveller (for EU/UK residents) – Covers altitude trekking and medical emergencies.

Things to Check Before Buying Insurance

- Read the fine print – Some policies exclude high-altitude activities unless specified.
- Ensure the policy covers Nepal – Some insurance providers exclude certain countries.
- Confirm the claim process – Check how to contact insurers in case of an emergency.
- Carry a printed copy – Some lodges and trekking agencies may require proof of insurance before issuing permits.

Cost of Travel Insurance for Nepal

- Basic trekking insurance (up to 3,000m) → \$50 – \$100 USD per trip
- High-altitude trekking insurance (above 5,000m) → \$150 – \$300 USD per trip
- Climbing insurance (6,000m+ peaks) → \$500+ USD per trip

Having the right insurance policy ensures you are financially and medically protected during your Nepal trek. Always verify coverage details before purchasing.

Gears and Equipment Recommended for Trekking in Nepal

Pushing in thin air in the piercing wind, freezing cold is never an easy thing to undertake. Himalayan treks often demand a high level of strength and endurance and a similar level of gear and equipment which can withstand the harshness of a mountain. Here is a complete list of gears and equipment we recommend for trekking in Nepal Himalaya:

Clothing (Layering System for Trekking)

Nepal's trekking regions experience temperature variations from 30°C (lower altitude) to -10°C (higher altitude). A proper layering system ensures adaptability to changing conditions.

Base Layer (Moisture-Wicking, Breathable)

- 2-3 Thermal tops (Merino wool or synthetic)
- 2-3 Thermal bottoms (leggings or long underwear)

Mid Layer (Insulation for Warmth)

- Fleece jacket or down jacket (for warmth)
- Softshell jacket or light insulated vest (for layering)

Outer Layer (Waterproof, Windproof Protection)

- Gore-Tex or equivalent waterproof shell jacket
- Waterproof hiking pants

Trekking Shirts & Pants

- 3-4 Quick-dry T-shirts (synthetic or Merino wool)
- 2-3 Convertible trekking pants (zip-off style preferred)

Cold Weather Gear (For High-Altitude Regions)

- Down jacket (800-fill recommended for subzero temperatures)

- Thermal gloves & mittens
- Insulated trekking pants

Rain Gear (Essential for Monsoon Season Treks)

- Lightweight rain jacket (Gore-Tex or similar)
- Rain cover for backpack

Footwear (For Different Trail Conditions)

Trekking Boots

Waterproof, high-ankle support boots (break them in before the trek)

Camp Shoes / Sandals

For walking around lodges and teahouses

Socks (Moisture-Wicking, Warmth-Retaining)

3-4 pairs Merino wool trekking socks (for cold and warmth regulation)

2 pairs liner socks (to prevent blisters)

Gaiters (For Snow & Muddy Trails)

Recommended for Everest, Annapurna, and Manaslu treks in winter

Accessories & Trekking Essentials

Backpacks & Bags

- 50-70L Backpack (for self-supported treks)
- Daypack (25-35L for guided treks with porters)
- Dry bags or waterproof pouches for electronics and important documents

Sleeping Gear

- Sleeping bag (rated -10°C to -20°C for high-altitude treks)
- Sleeping bag liner (for extra warmth & hygiene)

Hiking Accessories

- Trekking poles (collapsible, lightweight)
- Headlamp (with extra batteries)
- Sunglasses (UV protection, polarized)
- Water bottles (Nalgene or insulated flasks, 2L capacity minimum)
- Hydration bladder (optional but useful for easy access to water)

Navigation & Safety Gear

- Map & Compass (or GPS device if trekking solo)
- Multi-tool knife (Swiss Army or equivalent)

First Aid Kit & Medication

- Personal prescription medications
- Diamox (for altitude sickness, if advised by a doctor)
- Painkillers (ibuprofen or paracetamol)
- Blister treatment (Compeed, Moleskin patches)
- Bandages & antiseptic wipes

Personal Hygiene & Toiletries

- Biodegradable soap & shampoo
- Toilet paper & wet wipes
- Lip balm (SPF protection for dry, cold air)
- Sunscreen (SPF 50+)

Electronics & Communication

- Power bank (10,000-20,000mAh)
- Solar charger (for remote trekking routes)
- Local SIM card (NCELL or Nepal Telecom for network coverage)

Optional But Useful Gear

- Buff / Neck Gaiter – Protects against dust, sun, and cold.
- Lightweight Book / Journal – For downtime in teahouses.
- Snacks & Energy Bars – Available in cities but expensive in trekking areas.
- Duct Tape / Repair Kit – Useful for gear repairs on the trail.

Remember, especially the body gears should be better tested for safety as you can't afford to have gears that malfunction in high altitude. So, avoid knock off brands which might save you a bit initially but can eventually cost an entire adventure.

Altitude Sickness in Trekking

Altitude sickness, also known as Acute Mountain Sickness (AMS), occurs when the body fails to adapt to lower oxygen levels at high altitudes. It typically affects trekkers above 2,500 meters (8,200 ft) and can range from mild discomfort to life-threatening conditions. There are different types of altitude sickness. AMS is the most common and is the first stage in getting altitude sickness. AMS if left unchecked goes on to become dangerous.

Type	Symptoms	Altitude Range	Severity
Acute Mountain Sickness (AMS)	Headache, nausea, dizziness, fatigue, loss of appetite, difficulty sleeping	2,500m – 5,500m (8,200ft – 18,000ft)	Mild to Moderate
High Altitude Pulmonary Edema (HAPE)	Shortness of breath, persistent cough (frothy sputum), chest tightness, blue lips/nails	Above 3,500m (11,500ft)	Severe & Life-Threatening

High Altitude Cerebral Edema (HACE)	Confusion, loss of coordination (ataxia), severe headache, unconsciousness	Above 4,000m (13,100ft)	Fatal if Untreated
-------------------------------------	--	-------------------------	--------------------

Note: HAPE and HACE are medical emergencies that require immediate descent and oxygen treatment.

Risk Factors for Altitude Sickness

- Rapid Ascent – Climbing too quickly without proper acclimatization.
- Genetic Susceptibility – Some individuals are naturally more prone.
- Dehydration & Overexertion – Increases symptoms of AMS.
- Previous History of AMS – Higher risk if experienced before.

Prevention Strategies

1. Follow the "Golden Rule" – Climb High, Sleep Low

- Never ascend more than 500m (1,640ft) per day above 3,000m. Or simply, follow your guide
- Every 1,000m (3,280ft) gain, take a rest/acclimatization day.

2. Stay Hydrated & Maintain Nutrition

- Drink 3-4 liters of water daily to avoid dehydration.
- Eat carbohydrate-rich meals to sustain energy levels.

3. Avoid Alcohol & Sleeping Pills

- Alcohol dehydrates and worsens oxygen absorption.
- Sleeping pills suppress breathing and can increase AMS risk.

4. Use Acclimatization Stops

- Everest Base Camp Trek: Acclimatization at Namche Bazaar (3,440m) & Dingboche (4,410m).
- Annapurna Circuit: Rest at Manang (3,540m) before crossing Thorong La.

5. Medication (For High-Risk Trekkers)

- Diamox (Acetazolamide) – Helps prevent AMS; start 125-250mg twice daily before ascent.
- Dexamethasone – Emergency treatment for severe altitude sickness.
- Nifedipine – Used for HAPE cases.
- Please note that these medicines require a medical professional's prescription and can't be consumed haphazardly.

6. Descend Immediately if Symptoms Worsen

- If mild AMS symptoms persist, descend at least 300m (1,000ft).
- If HAPE or HACE symptoms occur, descend immediately with medical help.
- Emergency Treatment & Evacuation in Nepal
- Supplemental Oxygen – Available in some lodges and hospitals.
- Gamow Bag (Portable Altitude Chamber) – Used in extreme cases.
- Helicopter Evacuation – Costs \$5,000 – \$10,000 USD (covered by good insurance).

Travel Advisory for Nepal

Before travelling to Nepal, it's important to stay informed about safety, health, and entry requirements. Below is a detailed travel advisory covering safety, health guidelines, political stability, and essential travel tips.

Health & Vaccinations

- Required Vaccines: No mandatory vaccines for entry, but the following are recommended:
- Hepatitis A & B – Due to potentially contaminated food or water.
- Typhoid – For protection against foodborne illnesses.
- Rabies – If planning extended stays in remote areas.
- Tetanus & Diphtheria – Basic precaution.
- Malaria & Dengue: Malaria risk is low in Nepal's trekking regions but present in southern Terai areas (Chitwan, Lumbini).
- Dengue outbreaks occur seasonally (especially during the monsoon). Use mosquito repellent and wear long sleeves in affected areas.

Political Stability & Security

- General Safety: Nepal is politically stable and safe for travellers.
- Border Security: Certain trekking areas (e.g., Upper Mustang, Manaslu) require special permits. Travel to remote border regions (Tibet, India) may be restricted without prior approval.

Natural Hazards & Trekking Safety

- Earthquakes: Nepal lies in a seismically active zone. Follow emergency protocols in case of tremors.
- Landslides & Flooding: Monsoon season (June–August) increases risks of landslides and road blockages. Trekkers should avoid landslide-prone areas and check the weather forecast before trekking.
- Avalanches & Glacial Lake Outbursts: Winter and spring treks in high-altitude areas (Everest, Annapurna, Manaslu) may be affected. Hiring an experienced guide is strongly recommended. Our guides are well trained in avalanche safety and glacial hazards.

Crime & Personal Safety

- Crime Rate: Nepal has a low crime rate, but petty theft and scams exist.
- Common Scams: Overpriced taxis – Always negotiate fares or use ride-hailing apps.
- Fake trekking permits – Only book with registered trekking agencies. Booking with us gives you mental relief.
- Donation fraud – Verify NGOs before donating.
- Solo Travellers: Nepal is safe for solo travellers, including women, but trekking alone is not recommended in remote areas.

Transportation Safety

- Domestic Flights: Mountain weather can cause delays in flights to Lukla, Jomsom, and Pokhara. Book flexible return tickets in case of cancellations.
- Road Travel: Roads in Nepal are poorly maintained, and bus travel can be dangerous. Hiring a private vehicle with a driver is the safest option.

Communication & Emergency Contacts

- IM Cards & Internet: NCELL and Nepal Telecom (NTC) offer prepaid SIM cards for tourists. The internet is available in major cities but can be unreliable in remote trekking areas.
- Emergency Numbers:

- Tourist Police: 1144
- General Police: 100
- Ambulance: 102
- Nepal Immigration Office: +977 1-4113045

About Nepal

Nestled between India and China, Nepal is a stunning landlocked nation in South Asia. Nepal is renowned for having the highest mountain in the world, Mount Everest, and for its breathtaking Himalayan scenery, rich cultural legacy, and friendly people. Lord Buddha was born there, and it's a popular destination for hikers, climbers, and adventurers. A vibrant and spiritual destination, Nepal is remarkably diversified in terms of race, language, and religion despite its tiny size.

Total Population of Nepal

- As of 2025, Nepal has a population of approximately **31.5 million** people.
- The population is diverse, with over 100 ethnic groups and languages.

Nepalis Working Abroad

- Roughly **15–20%** of Nepal's population is working overseas, mostly in countries like **India, Malaysia, Qatar, UAE, and Saudi Arabia**.
- **Remittances** from these workers make up about **20–25% of the national GDP**, making it a major part of the economy.

Condition of Youth in Nepal

- Many youths are **unemployed or underemployed**, even after getting a degree.
- Due to limited job opportunities and political instability, a significant number choose to **migrate abroad** for work.
- Despite challenges, Nepali youth are **resilient, talented, and active** in fields like tech, tourism, and entrepreneurship.

Current Condition of Nepal

- Nepal is a **developing country** with immense natural beauty and potential, especially in tourism and hydropower.
- Major challenges include **poverty, unemployment, infrastructure issues**, and a high dependency on foreign aid and remittance.
- There's a growing **urban-rural gap**, and many remote areas still lack basic services.

Political Situation

- Nepal is a **federal democratic republic**, but its political landscape is often **unstable and fragmented**.
- Frequent changes in government, internal party conflicts, and a lack of long-term vision have slowed national progress.
- Citizens are hopeful for **better leadership and accountability**, especially from the younger generation of politicians.
